OBJECTIVE

Self motivated Senior Software Engineer with high experience on automations from tech services companies, looking for overseas experience and acquiring knowledge of IT cutting-edge technologies.

PERSONAL STATEMENT

I am passionate about creating intelligent solutions, delivering high-quality results through best practices, and contributing in collaborative environments. I actively stay updated on emerging technologies.

WORK HISTORY

NTT DATA Argentina
Buenos Aires, Argentina
December 2022 - February 2025

Senior Software Engineer
- Design, Development, Document, Troubleshooting and Monitoring of RPA automated solutions.
- Development and refactor of multiple automated scripts based on Microsoft .Net Framework (C#, vb.NET, VBA).
- Assisted on candidates technical selection and technical training of team collaborators.

DiRWA S.A
Buenos Aires, Argentina
August 2017- December 2022

IT Consultant
- Design, Development, Document, Troubleshooting and Monitoring Blue Prism solutions at Clients location.
- Working with multidisciplinary teams and multiple automation technologies.

QUALIFICATIONS

Universidad Nacional de La Matanza
Buenos Aires, Argentina
2012-2024

Degree
Bachelor in Computer Engineering

TECHNICAL SKILLS

- **Programming Languages and Frameworks**: Proficient in Microsoft .NET Framework (vb.NET, VBA, C#), Python, and Java for developing scalable and efficient software solutions. HTML, CSS, React, Node.Js and Typescript experience for Full Stack Development.
- **Version Control Systems**: Experienced with GitHub and GitLab for collaborative code development and repository management.
- **Robotic Process Automation (RPA)**: Expertise in Blue Prism (Certified Developer, Professional Developer, and Solution Designer), MS Power Automate (Cloud and Desktop Flows), and the UiPath Suite (Studio, Orchestrator, Assistant).
- **Database Management**: MS SQL Server, including query optimization and database administration.
- **Agile Methodologies**: Certified Scrum Foundation Professional with extensive experience in Agile project management and development lifecycles.
- **AI Engineering**: Skilled in applying prompt engineering for code optimization and logic refinement using tools like Axet.GAIA, MS Copilot, etc. Proficient in processing structured and unstructured files with Microsoft Power. Automate and Blue Prism Decipher.
- **Process Optimization**: Strong background in designing automation solutions and optimizing workflows to improve operational efficiency and scalability.

PERSONAL SKILLS

- Communication – in my role at NTT DATA I regularly interact with customers and team members to deliver automated solutions and troubleshoot incidents.
- Team management – at DiRWA S.A. i've lead a team of 4 people monitoring the status of current projects and taking action plans to optimize the control room, and reduce development stoppers.
- Self-management – in my roles at NTT DATA and DiRWA I was trusted to work independently and deliver automations at expected deadlines through all the SDLC.
